

A capital increase to support GIREVE's development

Paris June 21, 2021 - The FMET (Fonds de Modernisation Ecologique des Transports) managed by Demeter, Caisse des Dépôts, EDF, Enedis, the Renault Group and the CNR (Compagnie Nationale du Rhône), shareholders of GIREVE, launch a capital increase to support its growth and strengthen its position as a central player in electromobility,

A capital increase to support the strong growth of GIREVE.

Despite the Covid crisis, GIREVE has reported a strong growth in activity in 2020, which attests to the dynamism of the electric mobility sector in Europe.

Thanks to its central positioning and its detailed knowledge of the ecosystem, GIREVE is developing new intermediations, high value-added consulting, and training services, and is involved in numerous European initiatives with public and private players.

By structuring the market on issues as diverse as Plug & Charge, Smart Charge, MAAS and infrastructure rollout plan, GIREVE is establishing itself as a key player to support the development of all stakeholders in the sector.

A renewed trust in the expansion of GIREVE's activities and in its role as a structuring player in the market.

For Eric Plaquet, President of GIREVE: "This new fund raising is in line with the acceleration of the growth of the activity, with a volume of transactions higher than expected and an exponential increase in the volume of processed data. It consolidates GIREVE's position as a digital platform for charging, and GIREVE can fully assume its structuring role in all the challenges of the sector".

This capital increase is the sign of a renewed trust of the historical investors in the diversification of the company's activities as well as the relevance of GIREVE as a trusted third party in the charging value chain.

About GIREVE

Combining Market Place, Transactions Processing, and Data Management technologies, GIREVE is the leading B-to-B digital platform for electric recharging, offering the first coverage in terms of number of charge points in Europe. The company manages 3,800 contracts between 277 players in 32 countries and references more than 200,000 charge points, including 131,000 open to roaming.

For almost 10 years, GIREVE has been a central trusted third party for BtoB players in the charging sector, handling negotiations and transactions independently, securely, according to transparent rules, and in compliance with regulations.
